

LCS-Lecture Capturing System: -

Institute has installed DVR system which includes high definition camera installed in all the classrooms to capture the ongoing lectures. Separate team is formed to take care of the DVR and looks after the overall maintenance of this system.

Apart from this we have an “Open Broadcaster Software” which is a free open source software for video recording and live streaming, which is used by our faculties to record Desktop while teaching any concept and share that video with students by using Learning Management System.
