TRANSFORMING EDUCATION

A CLOSER LOOK TOWARDS THE EDUCATION SYSTEM.

Introduction :-

In order for a society to advance and thrive, education is necessary. India recently put into effect a New Education Policy 2020(NEP) to modernize its educational system to meet the expectations of the twenty-first century. This comprehensive scheme, which was introduced on 29 July 2020, aspires to enhance education in the nation by tackling numerous problems and offering creative answers.

Causes :

The prior educational system faces numerous problems i.e., rote learning, emphasis on memorization rather than critical thinking, absence of real-world application. Furthermore, there is a huge gap in the skills of the work force due to the mismatch between academic and vocational schooling. To develop critical thinking and real-world application education system was not able to provide it. Hence, New Education System is established.

Problems and Solutions:

The strict division between the streams of arts, commerce & science. Allowing students to choose subjects/courses according to their passions and interest, rather than taking courses on the basis of predefined professional pathways.

This is a holistic approach by the educational system.

This creates creativity and innovation among the pupils, and we will be raising a well-rounded students who can deal with the real world demands.

The NEP tries to encounter all the problems that were affecting the former education policy. From a very young age students are facing huge skills to develop their vocabulary and critical thinking capability. This will enhances the employment opportunities for them. The vast skills are introduced at very young age, it trains them in vocational knowledge

to the core curriculum. Because of it, the gap between educational and real-world application narrows down. It provides students with a better understanding between theoretical and real-world application, resulting in a workspace that is more competent self-assured.

Advantages and Disadvantages :

- NEP tackles all the problems of the former education policy, there are many advantages in NEP. Advancement in education system plays an important role.
- Students have a strong foundation at an early age that impacts the learning outcomes in later stages more drastically.
- Technology in the classroom improves accessibility of teachers . This increases the quality and understanding of students and gives teachers more modified teaching tools.
- It creates more understanding among the students, leads to curiosity and innovation thanks to the flexible curriculum.
- In order to change the Board system, country like India needs more infrastructure and large amount of investment. NEP tackles them all.
- NEP implemented (5+3+3+4) system.

i.e 5 years = strengthening foundation stage

3 years = preparatory stage of education

3 years = middle stage and rest stage

4 years = Secondary educational stage

Conclusion:-

New education policy of India represents paradigm shift, which is versatile, inclusive and future ready. NEP includes growth and learning to succeed in this world and sustain in it. The primary aim of this policy is to improve them in abilities and information for this constantly changing world. Students are trained in multidisciplinary education, vocational training and technological integration.

India took a brave step towards changing educational system leading them to a student that talented. The students are logical thinkers, problems solvers and leaders which lead the nation towards wealth and development. Together with an unwavering dedication we can create a world which is more optimistic and brighter.
